

SAFMA CELEBRATES XMAS

SAFMA President and Volunteers spread cheer at the Orthopaedic Ward, St. Stephen's Hospital on 25.01.2017. Spreading love, laughter and goodwill, distributed were outfits to the young girls. SAFMA has been supporting reconstructive surgery for Polio Patients, and donating to the Stephen's Patient Welfare Society.

SAFMA volunteers interacted with girls, who had contracted polio in their infancy. Lack of funding and access to education were barriers in their leading a normal life. It was only through word of mouth that they came to know of the reconstructive surgery facility being offered by St Stephens Hospital. Parents of the girls who had had apprehensions of their daughter remaining unmarried, now after their surgery were enthused with hope of their being able to lead a normal life.
